

I was recently made aware of the plan of the FCC to possibly lift a ban on companies owning a TV station and a newspaper in the same town. That ban is in place (from what I understand) to prevent a news monopoly... anyone knows that big business often has vested interests in certain issues being portrayed certain ways. I believe it is important for media not to be monopolized by a single corporation. I also think that this may weaken the printed word by making it part of the television industry. Thank you for not allowing this cross ownership ban to be weakened.
